# Base Strategy

## Motivation

매도세가 약해지고 매수세가 강하게 이어졌을 때를 포착하여 매수를 하겠다.

$$f_T = \frac{C_T - O_t}{\max_{s \in [t, T]} H_s - \min_{s \in [t, T]} L_s}$$

$C_T$ : Close Price at the end of window (종가)

$O_t$ : Open Price at the start of window (시가)

$\max_{s \in [t, T]} H_s$ : Highest Price in the window scope (고가)

$\min_{s \in [t, T]} L_s$ : Lowest Price in the window scope (저가)

*signal*

$$= \min_{b \in \{s, m\}} \{ b: f_t \leq \text{thres and } f_{t+b} \geq 0 \}$$

$s$ : scope length

$m$ : max length (daily length)
